María Pacheco

- Fullstack Engineer

ABOUT

Fullstack engineer with 6+ years building web and mobile products, from frontend craft to cloud infrastructure. I build with AI-assisted workflows every day, from coding agents to LLM-powered features. I lead with curiosity, mentor new engineers and advocate for women in tech. I believe everything can always be better, and I like to be the one making it so.

EXPERIENCE

Senior Applications Developer

May 2022 — Present

TELUS Digital · Vancouver, Canada (remote)

Responsible for development and production support of custom requirements in frontend and backend technologies, using AI-assisted workflows in day-to-day development.

Fullstack Developer & Consultant

2019 — Present

Freelance · Guatemala City

End-to-end web and mobile products for clients: architecture, development, cloud infrastructure and billing.

- **FideClub** — loyalty-card mobile app in React Native/Expo with an Express/PostgreSQL API; QR scanning, push notifications (FCM/APNs) and Stripe payments.
- **Rutas Orientales** — transportation management system on Google Cloud Run and PostgreSQL.
- **Tienda online RO** — online bus-ticket store for Rutas Orientales; Cloud Run infrastructure (staging and production), Cloudflare DNS and payment-gateway integration.

Jr. Fullstack Developer

Apr 2020 — Apr 2022

KOR, FLUX Inc. · Vancouver, Canada (remote)

Fullstack development of web applications with React, Node.js, Sass, Jenkins and AWS.

AWARD

Solis Award

TELUS Digital · Americas Luminary Awards 2026

For diversity and inclusion work, advocacy for women in tech and mentorship of new engineers.

CERTIFICATIONS

OpenJS Node.js Application Developer (JSNAD)

The Linux Foundation · 2022

Cloud Digital Leader

Google Cloud · 2023

EDUCATION

Professional Diploma in UX Design

UX Design Institute

2025

Bachelor's in Informatics Engineering

Universidad Mesoamericana, Guatemala

2015 — 2019

LANGUAGES

Spanish — native

English — C1

SKILLS

AI-assisted development	Claude Code, Cursor, Codex; model selection by task; token optimization for AI workflows; context engineering (CLAUDE.md, .cursorrules, specs); AI-assisted code review before production; automated testing
AI in products	LLM APIs (Anthropic, OpenAI) integrated into apps; AI agents and MCP servers (GitHub, databases, cloud); AI-assisted UX prototyping and flow validation
Responsible AI	No secrets or client data sent to models; human review before every merge
Frontend	React, Redux, React Native / Expo, JavaScript, HTML, Sass, GraphQL, grid-based layouts
Backend	Node.js, Express, PHP, PostgreSQL, MySQL, MongoDB
Cloud & DevOps	Google Cloud (Cloud Run), AWS, Cloudflare, Jenkins
Product & design	UX design, user research, Figma, prototyping, Stripe
Ways of working	Project management, team leadership, mentoring, clear communication, self-directed, problem solving, attention to detail

LEADERSHIP & COMMUNITY

- Mentor to new engineers; recognized with the Solis Award at the 2026 Americas Luminary Awards.
- Advocate for women in tech and for diversity and inclusion at TELUS Digital.
